Gentlemen

It affords me very sincere pleasure to be informed, by your Letter of the 19<sup>th</sup> of the humane and disinterested views which have influenced you to undertake so long a journey from the hopes of giving assistance in the establishment of a just & equitable Peace between the United States and the Native Amer.<sup>ns</sup>

Be assured Gentlemen that the accomplishment of that object, is nearest my heart & that I have long most sincerely wished to see a period to the effusion of human blood.

I can not tell when the treaty will commence at Sandusky, the Indians being at present
